User Story

As a Movie Watcher

I want information about a Movie

So that I can make a decision to watch or not

Acceptance Criteria

GIVEN I am trying to find a new Movie

WHEN I enter a movie title and click the Search Button

THEN I am presented with webpage with a relevant trailer, short plot summary, and ability to add the movie to a list

THEN IF I like the movie, it will be added to a list of liked movies and also to the client-side local storage.

GIVEN I want to remove a movie from the list

THEN I will be able to click something on the list to remove the movie and also remove it from the client-side local storage.

GIVEN we want to rearrange the movies in the list

THEN we will be able to grab and reorder the list
